

Demo mode — a sample student

See every part of the portal with made-up data, without signing in. Useful before you register and for staff showing someone what to expect.

1 What this page is for

WHAT DEMO MODE IS

Demo mode fills the portal with an invented student, **Maria Sample**, so anyone can see what a real portal looks like. It shows two programs (Certified Nursing Assistant and CPR / BLS Certification), a payment plan, three payments, a week of lessons and a set of contact details.

IS ANY REAL INFORMATION SHOWN?

No. In demo mode the page does not contact the school database at all. Every name, date and amount is written into the page itself. Links to files in the demo lessons do nothing.

HOW YOU KNOW YOU ARE IN THE DEMO

A **yellow bar** stays at the top of the screen the whole time: *Demo — sample student, sample data. No real student records are shown.*

The dates and money in the demo are examples only. They are not the real price or schedule of any program. For real dates and prices use the school website or call the school.

2 Step by step

Open the demo

1. Open the Student Portal sign-in screen.
2. Tap **See a demo** (the button with the eye).
3. Or add `?demo=1` to the end of the address, for example `all-is-well-student-portal.vercel.app/?demo=1`. Staff can send that link to someone.

Leave the demo

1. Tap **Exit demo** in the yellow bar.
2. The normal sign-in screen comes back.

3 If something looks wrong

I signed in but I still see Maria Sample.

You are still in demo mode. Tap

Exit demo

, then sign in with your email. If the address bar ends in `?demo=1`, remove that part.
